AI VOICE AND LIKENESS RELEASE

UNSIGNED WORKING DRAFT — resolve actual authority, permissions, privacy and execution requirements before signing.

Agreed effective date: [DATE]

Person whose identity is involved: [PERSON WHOSE IDENTITY IS INVOLVED FULL]

Person or representative address: [PERSON OR REPRESENTATIVE CONTACT ADDRESS]

Status of the person: Adult

Grant signatory and actual capacity: [PERSON SIGNING THE GRANT NAME AND]

Recipient: [RECIPIENT LEGAL NAME], [RECIPIENT ADDRESS]

Recipient signatory: [RECIPIENT AUTHORIZED SIGNATORY AND TITLE]

Chosen governing state: [STATE]

Actual residence/domicile, dates and places of use: [ACTUAL RESIDENCE DOMICILE RELEVANT DATES AND]

The person or authorized rightsholder identified above (the Grantor) and the Recipient enter this agreement for the specific uses below. A representative acts only within actual authority; identifying an executor, relative, guardian, licensee or agent does not itself establish ownership or power to grant another person's rights. This agreement takes effect upon actual execution and satisfaction of any stated conditions and legally required approvals. It does not backdate a signature or authorize an earlier unauthorized use.

1. Rights and authority

Actual ownership, capacity, authority documents, existing grants and required consents: [ACTUAL OWNERSHIP CAPACITY AUTHORITY DOCUMENTS EXISTING]

Authority review: Unresolved

Only rights actually controlled by the Grantor within the specified scope are licensed. Identify the source and extent of any representative or derivative authority, co-owner approvals, existing grants and applicable restrictions. No missing consent, appointment, registration, court approval, copyright license or collective bargaining term is deemed obtained by this agreement. Supply the actual required documents before relying on the grant. A claim of authority is not independent verification of it.

Applicable jurisdiction, publicity, privacy, employment, union and sector review: [APPLICABLE JURISDICTION PRIVACY PUBLICITY EMPLOYMENT UNION]

Personal/professional services or collective bargaining applicability: Unresolved

The applicability selection does not exempt services that are actually covered. Resolve any relevant services or collective bargaining requirement before the activity begins.

2. Attributes, materials and intended use

Specific project, uses, media, scripts, audiences and limits: [SPECIFIC PROJECT INTENDED USES MEDIA SCRIPTS]

Exact materials, source rights, versions and exclusions: [EXACT RECORDINGS IMAGES CAPTURES SOURCE RIGHTS]

Voice only. The identified voice attributes are included. No visual-likeness permission is granted.

No additional name, signature or persona permission is granted.

The identity permission and rights in recordings, images, music, scripts or other underlying works are separate. The Grantor does not license third-party copyrights, performances, trademarks or other rights it does not control. Obtain the actual required rights before use. The listed materials do not include every recording or image of the person available from another source.

New capture not granted.

Existing-material use not granted beyond an expressly permitted activity below.

Synthetic performance creation and use not granted. No permission to generate, publish or distribute a new performance is implied by a model-development selection.

3. Model operations, approval and recipients

Models, operations, data, recipients, hosting and limits: [IDENTIFIED MODELS OPERATIONS DATA RECIPIENTS HOSTING]

Base-model training not granted.

Fine-tuning or adaptation not granted.

Evaluation or benchmarking not granted.

These choices are independent. Each permitted operation remains limited by the actual materials, purpose, model specification, duration, territory and handling terms. Development permission alone does not grant

AI Voice and Likeness Release • LocDocument.com • SAMPLE

unrestricted inference, output publication, endorsements, unrelated improvement or perpetual model rights. Use of another provider's model or platform must also comply with its actual terms and any required permissions; this agreement does not alter them.

Script/output approval, contacts, deadlines and change procedure: [ACTUAL SCRIPT OUTPUT APPROVAL REVIEW CONTACTS]

Follow the actual approval procedure before the affected generation or release. Approval covers the identified version and use only. Silence or a selected form category does not represent a person's actual approval. Maintain accurate records of materials, versions, instructions, permissions and distribution needed to demonstrate the agreed scope and respond to a dispute.

No additional recipient, sublicense or assignment permission. Obtain actual authorization and required arrangements before providing access or transferring rights to another person.

No model, weight or embedding transfer or public release is granted. A service-provider or output-use permission does not override this limit.

4. Commercial scope, duration and compensation

Non-commercial scope. No advertising, sale, paid promotion or other commercial exploitation is granted. Define and resolve any uncertain monetization before use.

No endorsement permission. Do not state or imply an endorsement merely because identity use is authorized.

Non-exclusive grant. The Grantor retains the ability to license its rights to others, subject to actual existing obligations.

Actual start, end, renewal and continuing-use terms: [ACTUAL START END RENEWAL AND PERMITTED]

Countries/territories, audiences, media and access restrictions: [ACTUAL COUNTRIES TERRITORIES AUDIENCES MEDIA AND]

No worldwide or perpetual permission is inserted by default. An output or model created during the term does not automatically acquire an unlimited post-term license. Identify any lawful continuing rights expressly and reconcile them with the ending and mandatory-rights provisions.

Compensation arrangement: Flat Fee

Agreed flat fee: [ACTUAL FLAT FEE]

AI Voice and Likeness Release • Document.com • SAMPLE

Consideration, payment trigger, deadlines, accounting, tax and nonpayment terms: [ACTUAL CONSIDERATION PAYMENT TRIGGER DEADLINES ACCOUNTING]

Apply the actual agreed trigger and payment conditions. No thirty-day deadline or quarterly royalty schedule is supplied by default. If there is no monetary payment, assess the actual consideration, formalities and enforceability; a label does not conclusively establish a binding gratuitous release. This agreement does not waive statutory remuneration or other nonwaivable rights.

5. Privacy, security and content limits

Privacy/biometric/recording review: Unresolved

Actual purposes, notices, consents or other lawful bases, recipients, safeguards, retention, transfers and rights: [ACTUAL PROCESSING PURPOSES NOTICES CONSENTS OR]

Identity permission does not replace a required biometric notice and written release, recording consent, privacy notice, lawful processing basis, transfer arrangement or children's-data requirement. Determine whether a recording, voiceprint, face geometry or other derived information is covered by the actual law; not every recording is automatically a statutory biometric identifier, and a different label does not remove coverage. Implement the required notices, choices, retention/destruction policy, security and recipient restrictions before affected handling. Do not sell or otherwise exploit data contrary to a statutory prohibition merely because a license allows commercial use.

Any required consent must be specific and valid for the actual purpose. Preserve applicable withdrawal, deletion, access and other rights. An intellectual-property or publicity license is not a waiver of those duties, and the contractual withdrawal choice below does not override them. Record actual limitations and legal requirements for prompts, logs, datasets, outputs and model artifacts; do not certify anonymous status solely from a processing label.

Actual content restrictions, exclusions and disclosures: [ACTUAL CONTENT RESTRICTIONS EXCLUSIONS AND REQUIRED]

No unlawful impersonation, deception or otherwise prohibited activity is authorized. This general agreement does not supply a separate, specifically required consent for intimate or sexually explicit depictions, election communications, regulated claims or other specially regulated uses. Obtain the applicable lawful arrangement before such activity. No consent to unlawful sexual content involving a minor can be created by this agreement. Comply with applicable AI-content, advertising, platform and sector disclosure duties; a label does not cure an unauthorized or unlawful use.

6. Withdrawal, termination and ending use

Additional contractual withdrawal. The Grantor may withdraw under the actual procedure below, in addition to applicable mandatory rights.

AI Voice and Likeness Release • Document.com • SAMPLE

Contacts, timing, breach rights and mandatory-rights procedure: [ACTUAL WITHDRAWAL TERMINATION CONTACTS TIMING BREACH]

Effect on new/existing outputs, distribution, copies, backups, models, retention and compensation: [ACTUAL EFFECT ON EXISTING NEW OUTPUTS]

Actual return/deletion/model remediation evidence and limitations: [ACTUAL DELETION RETURN MODEL REMEDIATION EVIDENCE]

On expiry, termination or effective withdrawal, stop affected uses as required by the actual terms and controlling law. Identify any lawful continuing distribution or archival use, obligations of recipients, and required return, deletion, restriction or remediation. A statutory withdrawal deadline is not replaced by a longer contractual notice period. Retain information only on a lawful basis and with appropriate restrictions; a legal hold does not grant continued commercial use or training.

Do not promise completed model retirement, unlearning or destruction without the actual technical and legal basis. Document remaining artifacts, practical capabilities, required corrective measures and accurate evidence of completion. Neither a model's technical persistence nor prior investment creates a new right to continue prohibited uses. Treat earned compensation, refunds and losses under the actual agreement and law rather than an automatic forfeiture or reimbursement rule.

7. Risk, mandatory rights and execution

Actual warranties, liability, indemnity if any and exceptions: [ACTUAL WARRANTIES LIABILITY ALLOCATION INDEMNITY IF]

The permission applies only to uses within its actual scope and lawful authority. It is not a release of every existing or future claim, a waiver of every statutory defense, or a guarantee that no other law applies. Applicable exceptions, constitutional protections, third-party rights and nonwaivable duties remain subject to their actual requirements. This agreement does not decide whether a different use would be lawful without consent.

Notices, disputes, forum and contacts: [NOTICES DISPUTES FORUM AND ACTUAL CONTACTS]

Execution formalities, supplied instruments and signing arrangements: [REQUIRED EXECUTION FORMALITIES SUPPLIED INSTRUMENTS AND]

Actual review, evidence and remaining issues: [ACTUAL LEGAL RIGHTS PRIVACY AND EXECUTION]

Chosen law applies only as controlling law permits; residence, domicile, location of conduct, dates and other connections can matter. No generic choice-of-law clause certifies compliance in every state or country. Only identified documents actually supplied and agreed are incorporated. Reconcile existing

AI Voice and Likeness Release • Document.com • SAMPLE

agreements and legally required formalities; amendments require an actual lawful written agreement. Severability does not promise automatic judicial rewriting. Counterparts and electronic signatures may be used only where applicable requirements allow.

If notarization is required or chosen, obtain the correct certificate and procedure for the actual notarial act and jurisdiction. A generic certificate is not inserted here. Notarization does not itself establish the representative's authority, title to the rights, the truth of the document or its enforceability; obtain the separate evidence required for those matters.

Unsigned draft. Resolve authority, applicable requirements, the actual grant and review before preparing signature fields. This output supplies no execution fields.
