1. On January 18, 2022, the identified NY issuing tribunal entered the identified order requiring **Movant** to pay child support of **$2,400.00** per month for the following child(ren):

II. Basis for review

Controlling order and scope. The initial controlling order is identified as NY. For an interstate modification, the duration law of the initial controlling order must be considered separately from this forum's power to modify the order. The order provision and facts reported for this request are: Review child-specific duration under the controlling order and all additional terms.

New York duration of support. Under Family Court Act § 413, the ordinary parental support duty generally continues for an unemancipated child under 21. High-school completion or the eighteenth birthday alone does not establish emancipation. Review actual economic independence, the order and any agreed additional obligation. Under § 413-b and Domestic Relations Law § 240-d, a parent or kinship caregiver may petition for support until 26 for a person with a qualifying developmental disability who resides with and principally depends on the person seeking support. Review the diagnosis and accompanying report from a professional authorized by the statute. Mental Hygiene Law § 1.03(22) includes origin before 22, expected indefinite duration and substantial handicap. Identify existing adult support and remedies separately from ordinary minor support. New York Family Court Act § 413-b

California proceedings. Verify modification authority and the initial issuing law on duration under Family Code § 5700.611. Read §§ 3651 and 3653 for the restriction on changing accrued amounts and applicable effective dates; identify the allocation and withholding order separately.

2. The movant requests review of the following claimed event and its effect on the actual order:

- **Age Of Majority**, effective **October 31, 2026**.

3. Child-by-child legal and order review: Review education, age, remaining obligations and the original controlling order before ordering a change. School enrollment, disability, other continuing duties and other supported children may affect relief. No automatic termination or release of arrears or withholding is established here.

III. Arrears Preservation

4. No positive arrears amount is supplied. This is not a finding of a zero balance; see the actual record and unresolved questions above.

IV. Prayer

WHEREFORE, Movant prays that this Court:

A. Determine the continuing obligations, affected children and applicable duration law. The facts supplied do not support a request to end the entire current obligation.

B. Address any change in withholding separately. Continue to comply with the current order and applicable withholding instructions until lawfully changed.
