Texas nonparent child care record

Child: Morgan Sample. Prospective caregiver: Taylor Sample. Child's home: NY. Intended care: TX. Issuing court: IL.

Multiple jurisdictions. Verify the actual residence history, court orders and specific location where each act will be performed. A Texas relative, address or order alone does not select Texas law for care elsewhere. Ask the receiving provider or school which documents it can accept. Identify whether a parent can make a voluntary chapter 34 agreement, an already-authorized person can act, or a court petition is necessary. Use the official voluntary caregiver agreement only after checking its requirements. Consent to particular treatment under chapter 32 is a separate procedure.
